System RD vs Power System SR

The two transport anchor systems RD and Power SR, which have been established on the market for many years, are characterised by the following features:

System RD

- » Wide range of anchor types for many applications
- » Different lifting devices available, from simple Lifting loop with threaded end to high flexible Wirbelstar
- » Familiar colour coding for many years
- » All safety requirements in accordance with the Machinery Directive are met (CE marking)
- » Lifting inserts are available as galvanised or stainless steel version

Power System SR

- » Significantly higher load capacities compared to the standard RD system with the same load class
- » High specialised system of transport anchors, lifting devices and accessories
- » Special colour code
- » Safe lifting and mounting of big/heavy reinforced concrete elements
- » All safety requirements in accordance with the Machinery Directive are met (CE marking)
- » Easily recognisable by black chromated threaded inserts

Recess former SZ15

- » Specific inclination of transport anchors
- » No additional reinforcement for diagonal tension
- » Saves time and money during installation
- » Increases safety, simplifies anchor installation
- » Various sizes and materials
